

In October 2021, BioAgrar informed organic farmers and those who want to become organic farmers about current topics in the sector for the first time. The digital congress provided visitors with answers to questions about organic farming and showed them ways to successfully convert to organic farming.

BioAgrar is now planned as a trade fair with a congress and workshops at the Offenburg-Ortenau trade fair in October 2024.

The main topics will be: advice, monitoring, promotion, marketing and sales, production technology, research, training and further education, exchange of experience and best practice examples. The programme is aimed at various types of business, from animal husbandry, plant cultivation, viticulture and fruit growing to beekeeping.

We cordially invite you to participate in the seminar programme with a presentation!

ABSTRACT AND SELECTION OF PRESENTATIONS

The BioAgrar advisory board will select the presentations. Please submit a short abstract (max. one DIN A4 page) for the first review of the presentations. **Please note the submission deadline 31 May 2024.**

The abstract should contain the following information

- Title of the presentation
- Brief description of the presentation content
- Speaker / organisation, company / contact details
- Has the lecture already been given? Or has the presentation already been submitted in an ongoing call for papers procedure? If yes, at which event?

LECTURE DETAILS

The lecture language is German. An abridged version will be made available to visitors in an online library after the event.
